About This Manual

Purpose

This manual has been written to help you understand and use the Point of Sale (PoS) application. It explains the functional capabilities and operational details of PoS and contains the procedures that you need to know for performing the business tasks using the application.

The Database Maintenance tasks have not been covered in this manual.

Intended Audience

This manual is primarily intended for users at the Vends/Point of Sale and users of Hand Held Terminal (HHT) device.

Prerequisites for Use

Following are the prerequisites for understanding this manual:

- **Functional:** Basic understanding on operations of liquor manufacturing and distribution process is required.
- **Technical:** Basic understanding on working of computers and HHT device is required. You must be familiar with data entry operations.

Organisation of the Manual

This manual is organised as follows:

- **Introduction:** Provides an overview of the PoS application. It also details the hardware and software requirements, and its interfacing with other systems.
- **Getting Started:** Introduces you to the PoS application. It gives a brief introduction about the general working features of the application that you should keep in mind while working.
- **FAQs:** Is Included at the beginning to provide ready answers to the most commonly asked questions.

FAQs - Questions you may ask!

1. What is HHT?

HHT is a device used to scan liquor cases and bottles and then transfer the scanned data to the computer.

2. How to use the HHT?

HHT is a battery operated device. You can switch on the power button and start using the application for scanning and data transfer purposes.

3. How do I login to the HHT?

You need to create a user ID and then login to the HHT by entering the created user ID and password. For more information on how to create user id, refer "Maintaining user" section in "System Administration"

4. How do I transfer the data from HHT to the computer?

Data can be transferred to the computer by selecting the "Finish and Transmit" option through the Submit menu..

5. What happens if the data is not being able to transfer from HHT to the computer?

Check your Wi-Fi connection. The computer needs to be in the range of an enabled Wi-Fi device to transfer the data. If the HHT is connected to computer through a cable, ensure that the cable is well-connected to the PoS terminal.

6. How do I login to my computer?

You may login to the computer using a valid user ID and password provided by the vend in-charge.

7. How do I cancel or undo the current task?

You may cancel the current task on HHT by keeping pressed the Fn + F2 keys for 5 seconds. It will soft boot the device. Please note that this action will erase all data will from the HHT.

8. Can I leave a task at HHT without completing it?

No. You should not leave the HHT without completing the entire task. Only data transfer may happen later, if required

9. Will my data be saved in HHT, if I quit a task before completing it?

No, the data is not saved in such a case.

10. My HHT battery is discharged while my task is not complete. Is the data saved?

No, the data is not saved.

Know Your HHT

The HHT is a barcode scanning device used at Vends and Bonded warehouse.

The following figure presents the various components of HHT:

Figure 1: HHT

Know Your Desktop Computer

The desktop computer is used as a medium to connect to the ESCIMS application via internet and the HHT via Wi-Fi network/cable connection. The following figure presents the items required at vend to perform vend activities:

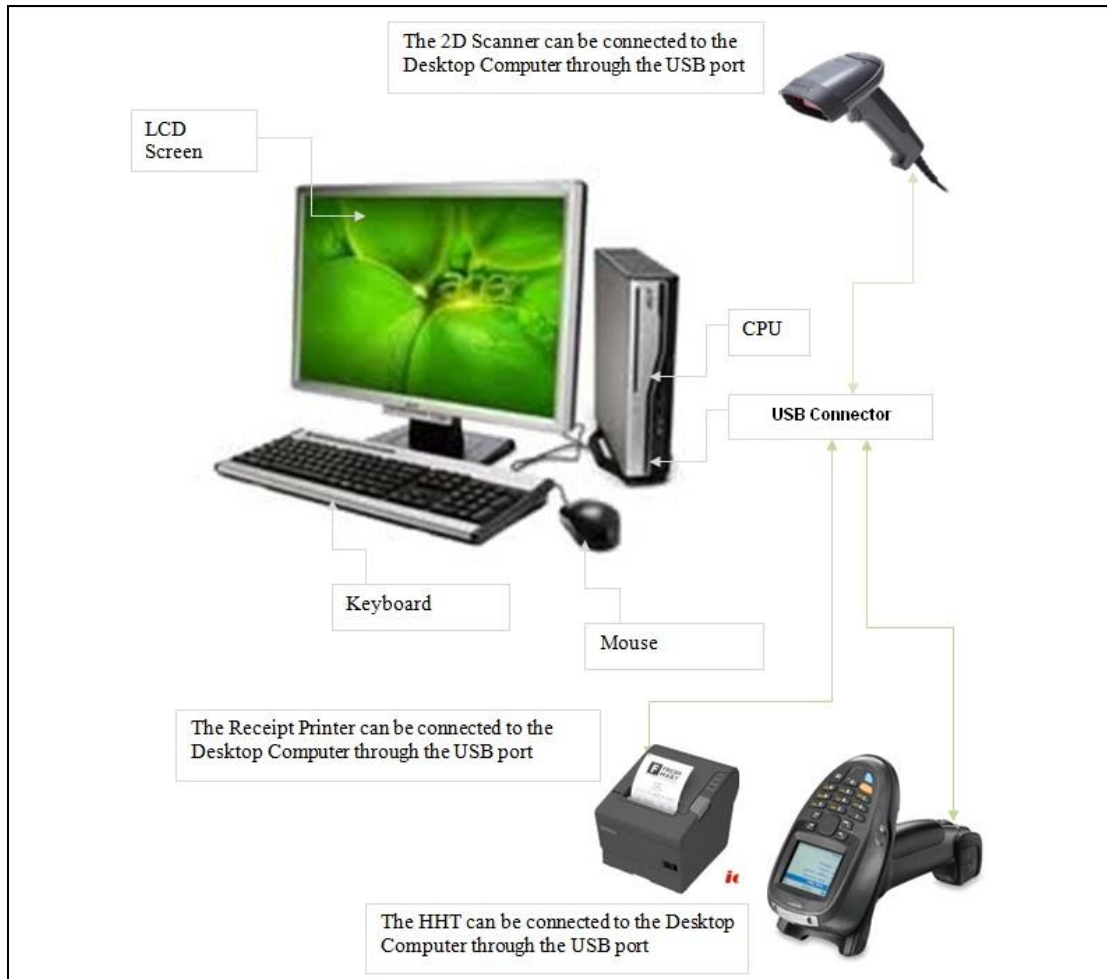

Figure 2: PoS Terminal

INTRODUCTION

Introduction to ESCIMS
Introduction to Point of Sale

1 Introduction to ESCIMS

ESCIMS is a simple Internet-based application centralised with the Excise department and interfaces with its stakeholders, including Distilleries, Bonded Ware Houses (BWH), Corporation and Private Vends, Canteen Store Depots, Hotels, Clubs and Restaurants.

The following figure represents the various stakeholders involved in the functioning of the project:

Figure 3: ESCIMS Ecosystem

The following figure represents the information flow between Point of Sale terminal and ESCIMS server:

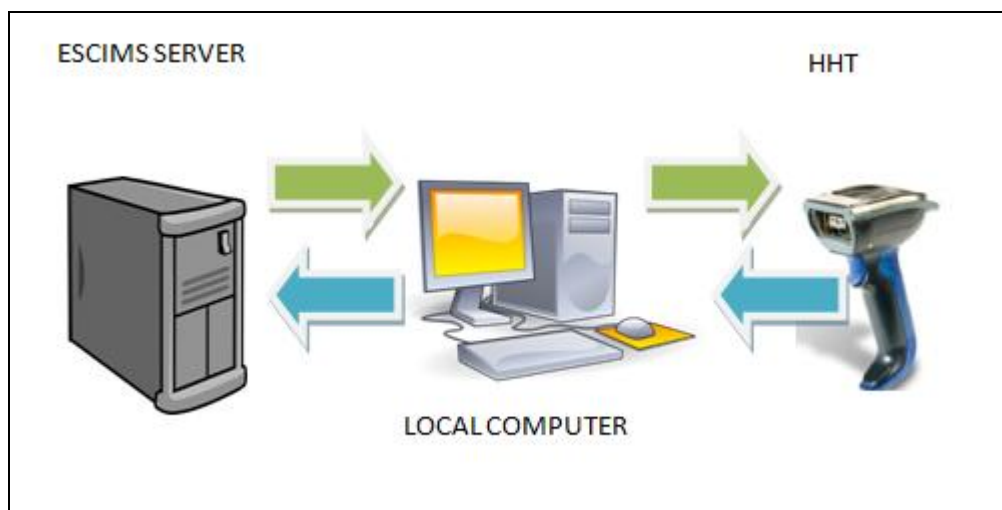

Figure 4: Information Flow at ESCIMS

The application has been developed as a part of the ecosystem to automate the supply distribution, ease out operations, bring in transparency and have better control over the supply chain management of liquor distribution. The application will allow a real time monitoring of the distribution of liquor, minimise adulteration and prevent sale of illicit liquor.

1.1 About PoS

The PoS application is used for receiving, selling and managing liquor at vends. It helps record the transactions taking place at vends and displays reports corresponding to sale, return, receiving of inventory and damaged inventory.

The information from PoS application is synchronised with the Core ESCIMS. The information change is updated in PoS at periodic intervals.

1.2 Features of PoS

Vend activities can be divided into the following five categories and their respective sub-categories:

- **Receiving Stock and Issuing to Counter**
 - Receiving Supplies
 - Issuing Stock to Counter
- **Selling and Returning Items**
 - Sale Process
 - Sale Process using HHT
 - Sale Return Process
 - Looking up Inventory
- **Marking Damaged Stock and Conducting Stock Take**
 - Marking Damaged Stock
 - Stock Taking at Point of Sale (PoS)
 - Day End Process
- **Administration**
 - User Maintenance
 - Synchronise PoS data
 - Configure Machine
- **Reports**
 - Transport Permit (TP) Details Report
 - Daily Sales Report
 - Inventory Status Report
 - Daily Activity Report

1.3 User Roles and Access Rights

The user roles are limited to sending the input data to PoS. The login ID is to confirm the identity of the user prevent manhandling of the device.

GETTING STARTED

Logging in PoS/HHT
Menus

2 Getting Started

This chapter explains the procedure of login to the PoS application and access the basic required functionality of the device.

2.1 Login

Access to the PoS application is limited to authorised users. To access the application, you need to login to PoS using your user ID and password.

2.1.1 Creating User ID

The login ID for vend in-charge will be created at the time of application setup. The vend in-charge will be provided the user ID and password. The vend in-charge can create user IDs in turn for the vend users. There is a limitation on maximum number of active vend users.

2.1.2 Setting Password

The vend in-charge will set the password for all the IDs of vend users.

2.1.3 Forgot Password

The vend users can ask the vend in-charge to reset the password. Vend in-charge can reset the password through the PoS User Master screen. The new default password will be same as the login ID of the user.

2.1.4 Changing Current Password

The vend user can change the current password through the Change Password screen. The user need to enter the current password, new password, confirm new password and click the Change Password button to change the password.

The following figure shows the Change Password screen:

Change Password

Enter the Details to Change Password

User Id	aq2012

Excise Department

"Department of Excise, Entertainment and Luxury Tax Govt. of Delhi: Revenue is the most important input for an able, efficient and resourceful administration. In India since ancient times, there has been well planned, well defined, clear, strong, and just system of revenue collection. With the passage of time there has been changes in the system of revenue collection. Today we find various tax free items, which were earlier used to be taxed".

Figure 6: Login Screen - PoS

2.2 HHT Login

2.2.1 Prerequisites

The following services should be running for HHT to work correctly:

- IIS Web Admin and World Wide Web Publishing - These can be accessed through Control Panel → Administrative Tools → Services
- Windows Mobile Device Centre – This should be installed and executed.
- The HHT should be connected to the PoS terminal through Wi-Fi or USB cradle for exchange of data with PoS terminal while logging in and while downloading the TP information to the HHT.

The following figure displays the HHT login screen:

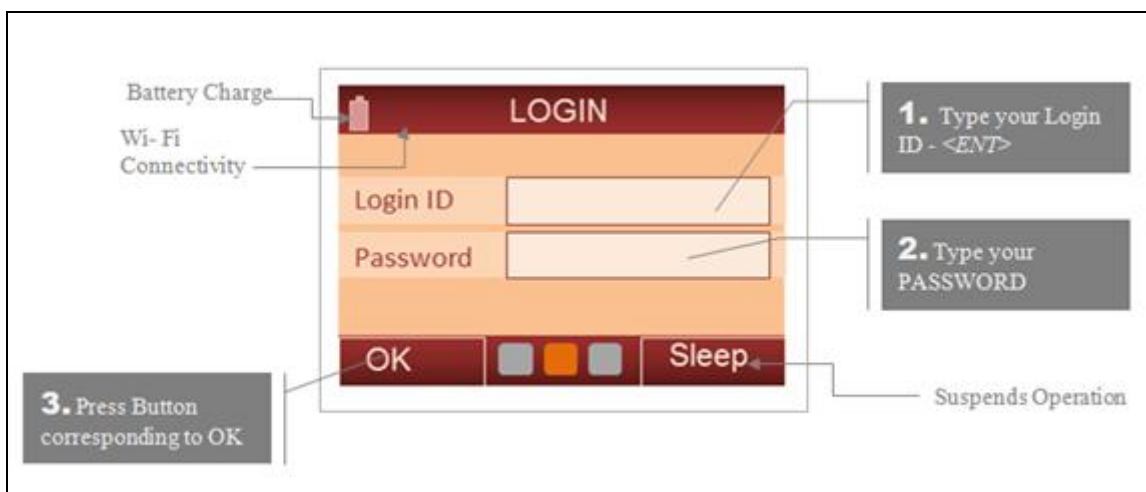

Figure 7: Login Screen – HHT

2.3 Logging Out of the HHT

1. Click the main menu.
2. Select the Logout option from main menu on the Home Screen. Click OK to confirm the selection.

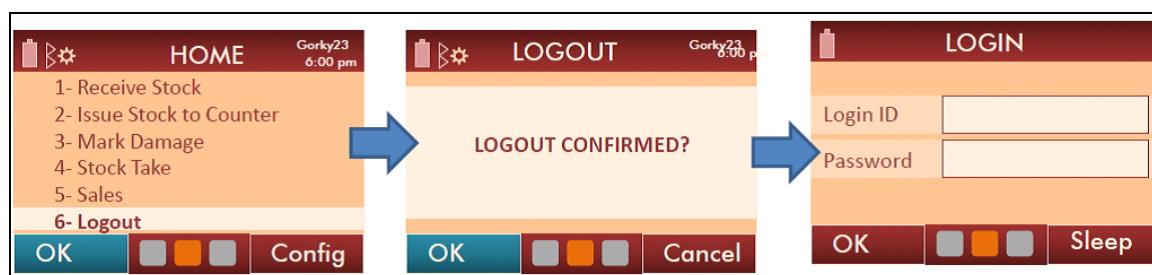

Figure 8: Logout screens

2.4 Familiarising with the Interface

The section familiarises you with the User Interface of the PoS application at the terminal and at the HHT to perform various tasks and operations.

2.5 Menus

The PoS application consists of the following menus:

Table 1: Application Menus

S. No.	Menu Name	Description
1	Admin	<p>This menu contains the following functionalities related to vend in-charge system admin operations:</p> <ol style="list-style-type: none"> User Maintainance Synchronise PoS data Configure Machine

RECEIVE SUPPLIES

Through HHT
Through Manual Entry

3 Receive Supplies

This chapter explains the procedure of receiving supplies at vend.

3.1 Receiving Supplies using HHT

The HHT device user scans the cases and/or bottles to receive the supplies. The detailed process for Receiving through the HHT is mentioned below:

1. Login to the PoS application on HHT.
2. After login, select the Receive Stock menu option from the main menu.
3. Use the navigation keys to move Up and Down to select and click the OK button to confirm the selection.

Figure 9: Menu Screen

4. The TP number can then be scanned or manually entered in the HHT. In case the manual entry is done, click the OK button to confirm the entry.
5. Multiple TPs can be scanned/entered one after another.
6. After scanning/entering all the TP numbers, press the Tab key from the keyboard to scan cases. The Scan Case field is activated only after the pressing the Tab button.

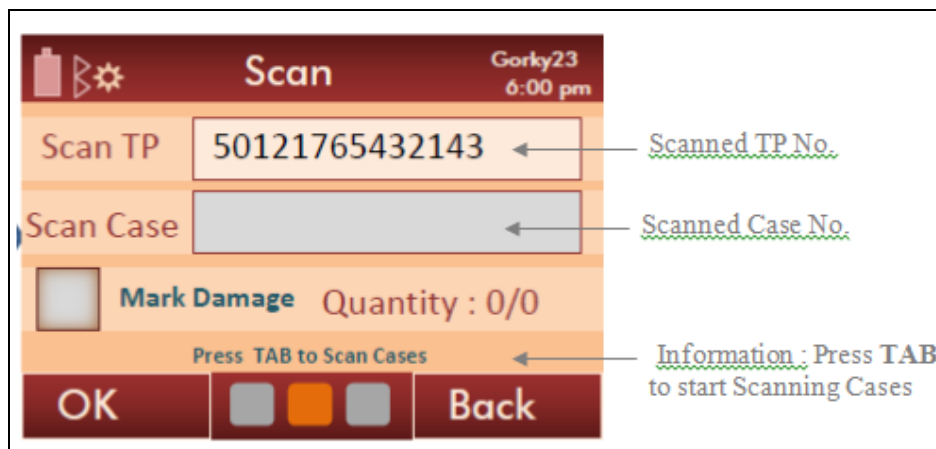

Figure 10: Scan TP

7. The cases can then be scanned one by one.
8. The Quantity field presents the total number of intact cases scanned against the total number of cases to be received. This field is updated when you scan the other case.

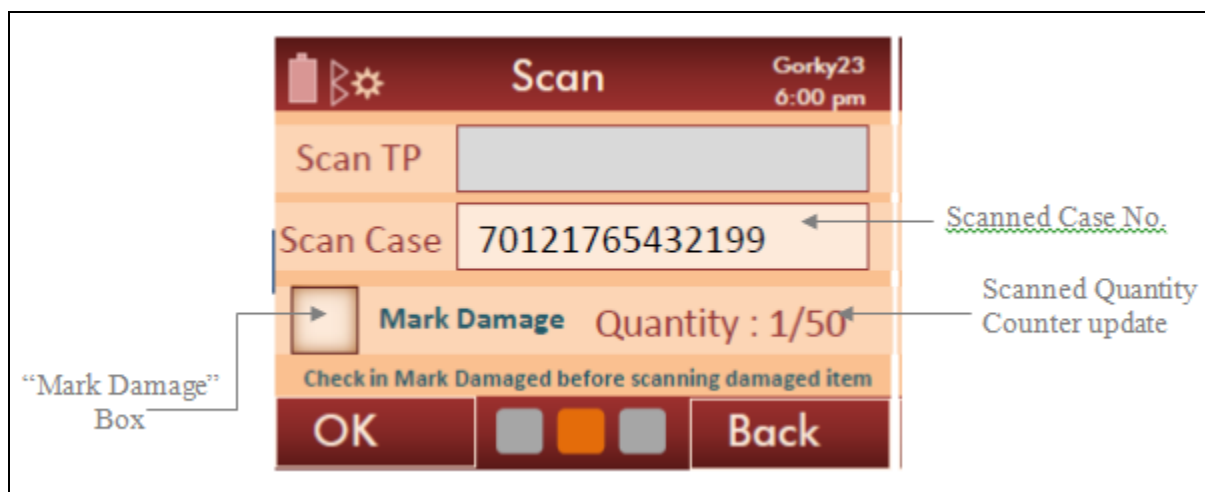

Figure 11: Scan Cases

9. Click the OK button to finish the scanning of all the intact cases.
10. This will lead to the generation of Summary Report.
11. The cases can be marked as damaged by selecting the Mark Damage check box and then scanning the damaged case.

Figure 12: Mark Damage

- The quantity at counter will not increase in case a damaged case is scanned.
- If you forget to mark the case as damaged, you may rescan it after checking in the Mark Damaged box. The system will overwrite the case as Damaged.

12. The Summary Report provides details of cases received, not received and damaged against the respective TP.
13. In case of multiple TPs, you can use arrow buttons to see the summary report against the next TP.
14. Click the OK button on the Summary screen select the **"Finish and Submit"** option to send the report for the received cases to the local computer.

Figure 13: Summary Screen

15. Once the report is sent to the local computer, the HHT shows a confirmation message: 'Information Sent Successfully'.

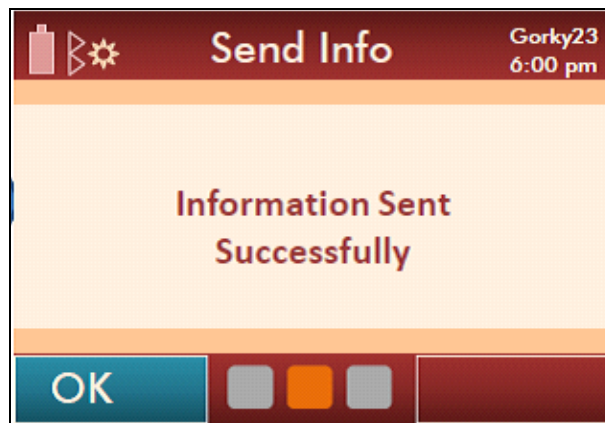

Figure 14: Send Info Screen

16. Click the OK button to return to the Home screen.
17. This confirms that the process of receiving stocks is successfully completed.

The screens of the Receiving process are summarised here:

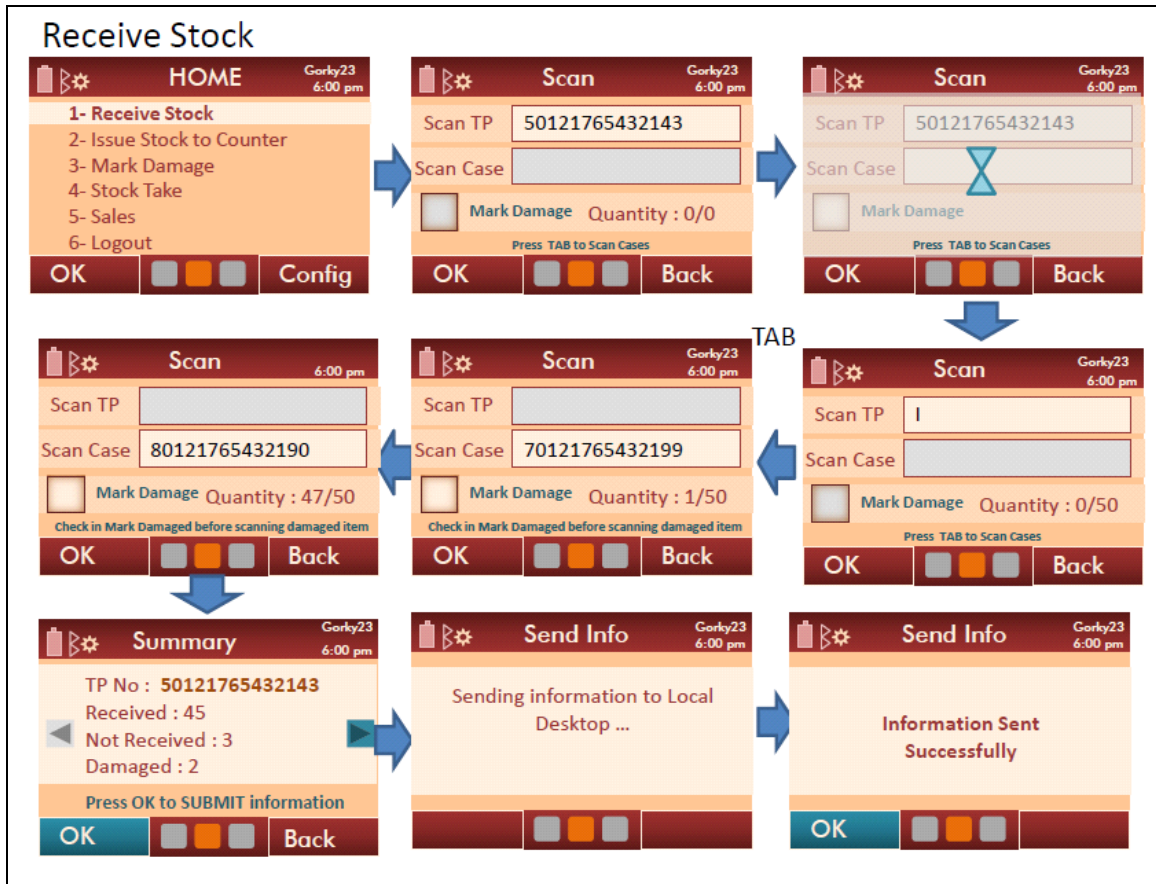

Figure 15: Receiving Supplies using HHT

18. Access the Receive Supplies functionality on the PoS terminal.
19. To receive the remaining cases, click the TP Number hyperlink on the View Advance Shipment Notice screen.

Figure 28: Sale Screen

Selling a case/bottle using PoS:

1. Access the Sale Case/Bottle functionality on PoS.
2. Scan the barcode on the bottle/case with 2D scanner. Repeat for each bottle/case to be sold.
3. Click the Done button.

- To complete the sale transaction, press the Space bar on your keyboard.
- To cancel and clear the Sale screen, click the Cancel Sale button or press the F12 key on your keyboard.
- To print a receipt, click the Print Receipt button or press the F6 key on your keyboard.
- To view the availability of the stock, click the Inventory Lookup button or press the F5 key on your keyboard..

5.2 Deleting a Case/Bottle

To delete a case/bottle from the transaction:

1. Scan the same barcode again. A confirmation message to delete the item from the grid will be displayed.
2. Click the OK button to delete.

3. Click the Cancel button to discard the delete action.

5.3 Inventory Lookup

Inventory Lookup allows you to lookup a specific brand or size available in the store or on counter for selling.

To lookup inventory:

1. Click the Inventory Lookup button on the Sale screen.
2. Search for required inventory and click the Cancel button to return to the Sale screen.

For more information, refer to the Section 6: Inventory Lookup.

5.4 Selling a Case/Bottle against P-10 Permit

Selling a case/bottle against P-10 permit:

1. Select the Yes option from the “P-10 Sale” dropdown list on the screen to display the P-10 number input field.
2. Enter the P-10 permit number in the input field.
3. Enter/scan the barcode on the bottle/case with 2D scanner. Repeat for each bottle/case to be sold.
4. Click the Done button.

5.5 Sample Printed Sale Receipt

The following figure represents the receipt of the sale transaction:

STOCK TAKE

8 Stock Take

This chapter explains the procedure of Stock Take at vend. Stock Take is the process to validate that the physical inventory matches with the logical inventory. This activity is conducted for all the stock at the vend including store and counter stock.

8.1 Stock Taking

For Stock Taking by the vend user:

1. Access the Stock Take functionality on HHT.

The following figure displays the Stock Take screens on HHT:

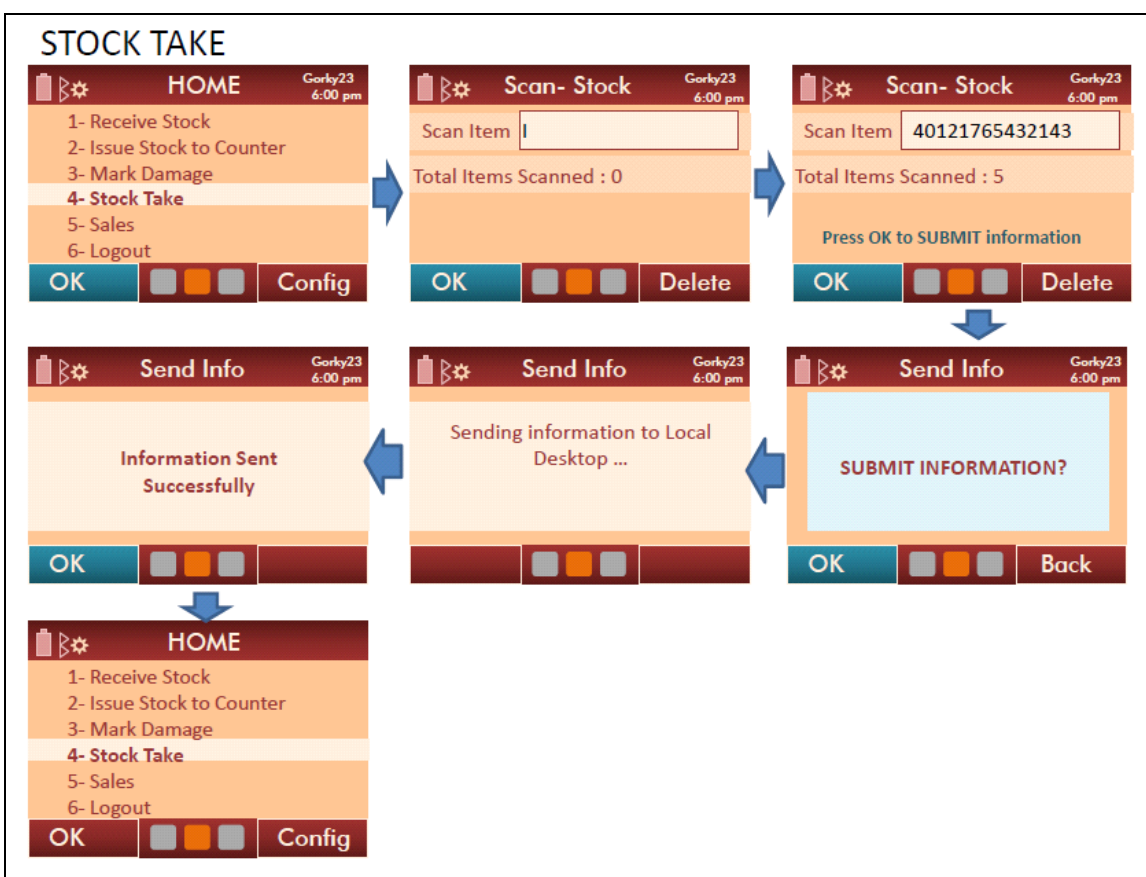

Figure 34: Stock Take using HHT

2. Scan the inventory in the store using HHT. Alternatively, enter the barcode number on HHT and click OK.
3. Repeat the steps for each bottle/case in inventory and click the OK button.
4. Access the functionality Stock Take in the PoS application.

Configuring Machines

12 System Administration

This chapter explains the procedure to perform system administration activities.

12.1 Maintaining User

The User maintenance screen will be used to create and update user-related data at PoS. At the time of initial setup for a particular vend, one user with Vend In-charge user role will be created at the vend along with the master data setup.

Vend in-charge will have the right to create users with Vend User role through the User Maintenance screen at PoS. At a particular vend, there will be only one user with the Vend In-charge role. Other users will have Vend User role only.

The following screen displays the User Maintenance screen.

Figure 51: User Maintenance Screen

To add a new vend user:

1. Access the User Maintenance functionality from the Admin menu.
2. Enter the user's name, father's name, date of birth, address, phone number, mobile number and click the Add button to create the user. The initial password will be same as user ID, which can be changed using the Change Password screen after login.

To viewing the user details, click the View hyperlink against the user ID. The Update button will remain disabled.

For updating an existing user details/markings a vend user as Inactive:

1. Access the User Maintenance functionality from the Admin menu.
2. Click the Update hyperlink against the user ID, which has to be edited.
3. Update the details under the Vend User Details section and click the Update button.

- User with Vend In-charge role cannot be marked as Inactive.
- Click the Reset Password button to reset the password of the user. The reset password will be become same as user ID by default.
- Once a user is created, it cannot be deleted from the system and will only be marked as Inactive.
- If a user is marked as Inactive, the PoS system will not allow the user to login into the system.

12.2 Synchronising PoS Data

In case of any change in the price in the core system, the user has to perform synchronisation to get the updated price in the inventory. The other master data can be synchronised through the Synchronise Lookup button. The buttons will be enabled if there is any change.

The following screen displays the Synchronise PoS Database screen.

Figure 52: Synchronise Database Screen

To update the price/update master data:

1. Access the Synchronise PoS Database functionality.
2. Click the Synchronise Price button to update the price of the inventory.
3. Click the Synchronise Lookup button to update other master data.

12.3 Configuring Machines

This screen is used to add the details of the machines available at the vend.

The following screen displays the Configure Machines screen.
