About This Manual

Purpose

This manual helps you understand and use the ESCIMS-SCM application module. It presents the functional capabilities and operational details of the Supply Chain Management (SCM) module and details the procedures for performing your business tasks with the application.

The tasks for database maintenance have not been covered in this manual.

Intended Audience

This manual is primarily intended for users at the Distillery, BWh, Hotel, Club and Restaurants.

Prerequisites for Use

The prerequisites for understanding this manual are as follows:

- **Functional** – Basic understanding of operation of liquor manufacturing and distribution process
- **Technical** - Basic understanding of computers and the Hand Held Terminal (HHT) device is required. You must also be familiar with the data entry operations.

Organisation of the Manual

The information in this manual is organised as follows:

Chapter	Description
Introduction	It provides an overview of the ESCIMS application. It also details the hardware and software requirements, and its interfaces with other systems.
Getting Started	It takes you on a quick tour of ESCIMS application. It gives a brief introduction about the general working features of the application that you should keep in mind while working.
Section of FAQs	It helps to provide ready answers to the most common questions
Dispatch & Receive Supplies Against Import Permit	It provides the description of steps followed in the supply chain for the consignments dispatched from Distillery and received at BWh against an Import permit.
Handle Breakage	It provides the description of the steps to be taken to handle the breakage done in transit and at BWh
Dispatch Against Transport Permit at BWh	It provides the description of the steps taken at BWh for the dispatch of consignment from the BWh for the pint of sale against Transport permit
Other Processes in Supply Chain	It provides the description of the steps taken against the other processes of supply chain
Receive Details and Upload Sales Details at HCR	It provides the detailed description of steps taken at HCR to receive the consignment and to issue the consignment from store to the counter
Operating Environment	This section gives details of the operating environment used in ESCIMS
Feedback and Suggestion	This section gives the details of the contact details for feedback and suggestion

FAQs

1. What is the HHT?

The HHT is the Hand Held Terminal used to scan cases and bottles and then transfer the data to the computer.

2. How to use the HHT?

HHT is a battery operated device. You can start using the HHT by switching on the power button and then use the application for scanning and data transfer.

3. How do I login to the HHT?

You need to create a user ID first, and then login to the HHT by entering your user ID and password.

4. How do I transfer the data from the HHT to the computer?

Data can be transferred to the computer by using **Submit**, when the HHT prompts you to do so.

5. What if the data is not being transferred from the HHT to the computer?

Check your Wi-Fi connection. Ensure you are within the range of an enabled Wi-Fi to transfer the data. If the HHT is connected to a computer via a cable, ensure that the cables are well connected to the PoS terminal.

6. How do I log in to my computer?

You can login to the computer using a valid username and password, provided to you by the vend in-charge.

7. How do I cancel/undo a task?

You can cancel a task on the HHT using the **F2** key. Please note that all data will be erased from the HHT once you cancel a task.

8. Can I leave an incomplete task on the HHT?

No you should not leave the HHT without completing the entire task. Only data transfer can happen later, if required.

9. Will my data be saved in the HHT if I quit a task before completing it?

No, the data will not be saved.

10. My HHT battery has gone out while before completing a task. Will the data be saved?

No, the data will not be saved.

Know Your Hand Held Terminal

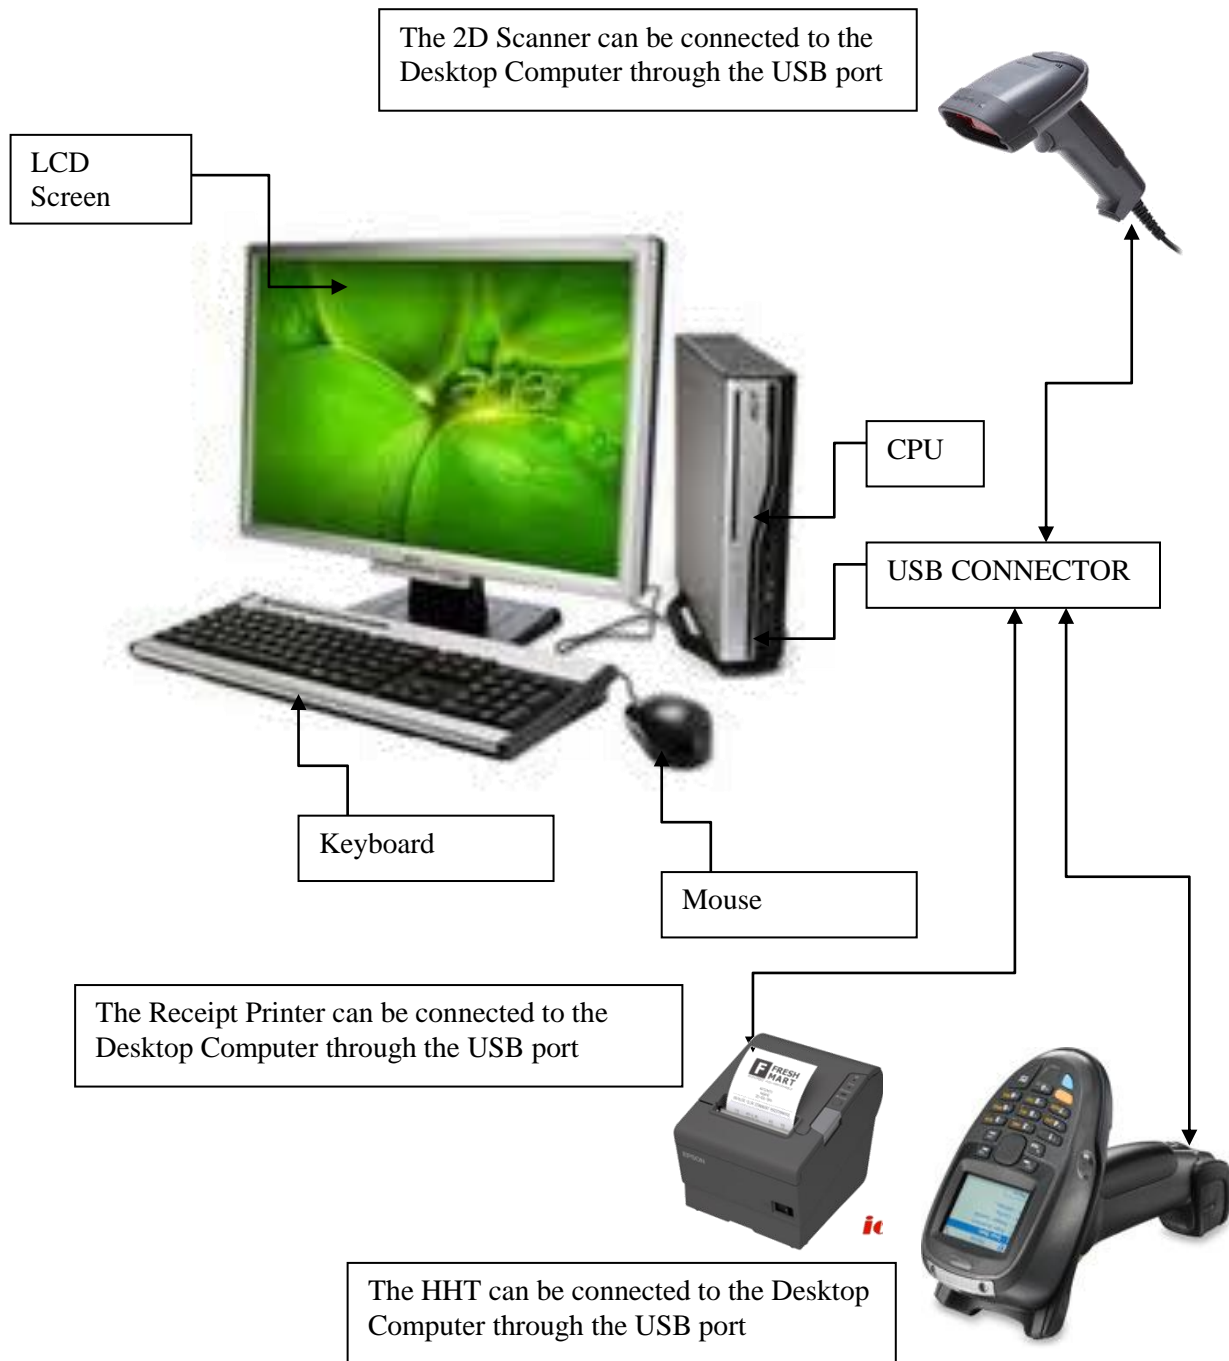

The HHT is a barcode scanning device used at Vends, BWh at other place

INTRODUCTION

1 Introduction to ESCIMS

Excise Supply Chain Information Management System (ESCIMS) is a simple internet based application between Department of Excise, Entertainment and Luxury Tax (Delhi Excise) and its stakeholders including Distilleries, Bonded Ware Houses (BWh), Corporation and Private Vends, Canteen Store Depots, Hotels, Clubs and Restaurants (HCR).

Figure 1 and figure 2 illustrate the Department's ecosystem; and the high level data flow process, respectively

Figure 1:ESCIMS Ecosystem

The information will flow to and fro from ESCIMS server to the local desktop, and then to the HHT. The following is a graphical representation:

Figure 2: Information Flow at ESCIMS

The application has been developed as a part of the Department's ecosystem to automate the supply distribution, ease out operations, ensure transparency and control the supply chain management of liquor distribution. The application allows real time monitoring of the distribution of liquor minimising adulteration and preventing the sale of illicit liquor.

1.1 About ESCIMS - SCM

The ESCIMS-Supply Chain Management (SCM) Module covers the functions performed by the external stakeholders of Delhi Excise. This includes the dispatching liquor from the Distillery to the BWh, handling in-transit and BWh breakage, and dispatching liquor from BWh to the Hotel / Club / Restaurants.

1.2 Activities of ESCIMS-SCM

The supply chain activities are available as the following options in the application:

- **Receive stock and Issue to the Counter**
 - **Generate Barcode Sequence Numbers**
 - **Dispatch Supplies against Import Permit**
 - **Receive Supplies at BWh**
- **Handle Breakage**
 - **Handle Breakage In-transit**
 - **Handle Breakage at BWh**
 - **Pay Breakage Duty (BWh)**
- **Dispatch against Transport Permit at BWh**
- **Receive Details and Upload Sales Data at HCR**
- **Other Processes in Supply Chain**
 - **Stock Ageing Analysis at BWh**
 - **Track through GPRS**
 - **Track and Trace through ESCIMS**
 - **View Inventory**
 - **View Registers**

1.3 User Roles

The User Roles of SCM Module are as follows:

- Distillery User
- BWh User
- Excise Inspector
- Hotel / Club / Restaurant User
- Superintendent - ILFL
- Assistant Commissioner – Permits
- Deputy Commissioner Excise

GETTING STARTED

Logging in to ESCIMS/HHT

2 Getting Started

This chapter deals with logging in to the application and accessing the basic functionality of the HHT.

2.1 Log In to the Application

This chapter deals with logging in to the application and accessing the basic functionality of the HHT.

Access to the ESCIMS application is limited to authorised users. Hence, you must log in to ESCIMS-using your user ID and password.

2.1.1 Create a User ID

The user ID is created by the administrator of the ESCIMS application. The user ID and default password are provided to you. You need to change the password after you log in for the first time.

2.1.2 Change Password

To change the password:

1. Click **Password Management** on the **Login** screen. The **Change Password** screen appears

2. Enter the old and the new passwords.
3. Click **Change Password**. The password is changed.

The password should be at least 8 characters long, should have capital letters and special characters.

Change Password

Enter the Details to Change Password

User Id	aq2012
Old Password	<input type="password"/>
New Password	<input type="password"/>
Confirm Password	<input type="password"/>

Change Password

Figure 3: Change Password–ESCIMS

2.2 Log In to HHT

The following services should be running for HHT to work correctly:

IIS Web Admin and World Wide Web Publishing - These can be accessed from Control Panel → Administrative Tools → Services

Windows mobile

The HHT should be connected to the desktop through Wi-Fi or a cradle, for the exchange of data with the desktop.

To log in to the HHT:

1. Enter the Login ID and Password on the **LOGIN** screen.
2. Click **OK**. Alternatively, click **Sleep** to exit the screen.

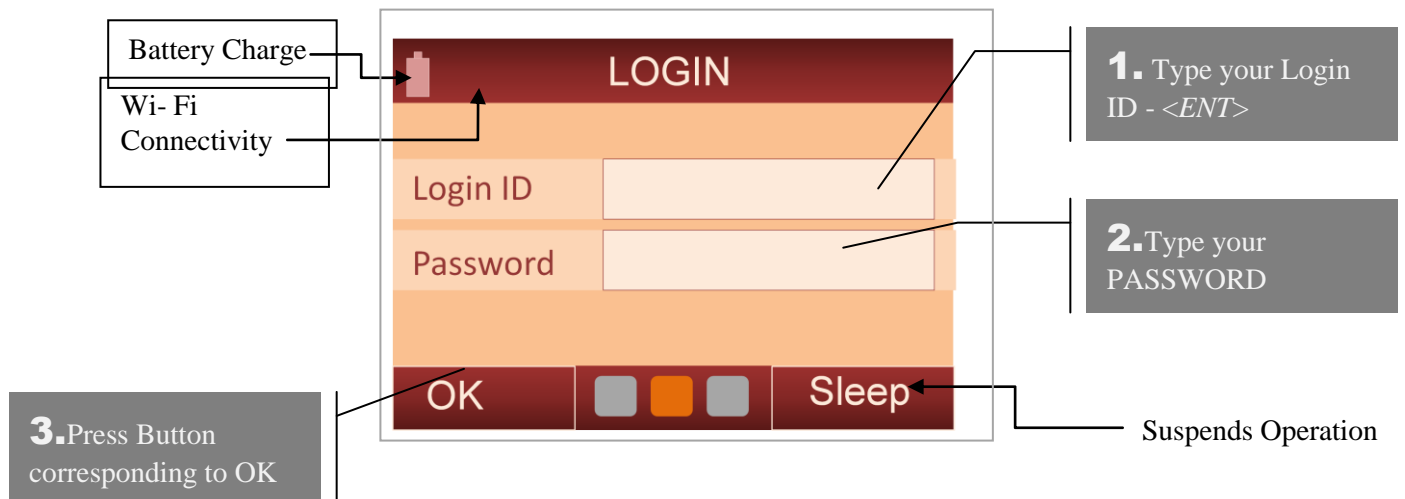

Figure 4: Login Screen – HHT

2.3 Menus

The ESCIMS – SCM Module consists of the following menus:

Table 1: Menus in the application

S. No.	Menu name	Description
1.	SCM	<p>Consists of the options related to distiller operations. The following options are available in the menu:</p> <ol style="list-style-type: none"> Generate Barcode Sequence Provide Barcode Details View Barcode Sequence <p>Consists of the options related to BWh operations. The following</p>

DISPATCH & RECEIVE SUPPLIES AGAINST IMPORT PERMIT

HHT
Manual Entry

3 Dispatch & Receive Supplies Against Import Permit

- The following ESCIMS processes are employed during the dispatch and receipt of liquor supplies from the Distillery to their respective Bonded Warehouses situated in Delhi: Generate Barcode Sequence Numbers
- Provide Barcode Details
- Dispatch Supplies against Import Permit
- Request for In-bonding
- Receive Supplies at BWh

The following diagram provides an overview of the various activities performed during the dispatch and receipt of liquor.

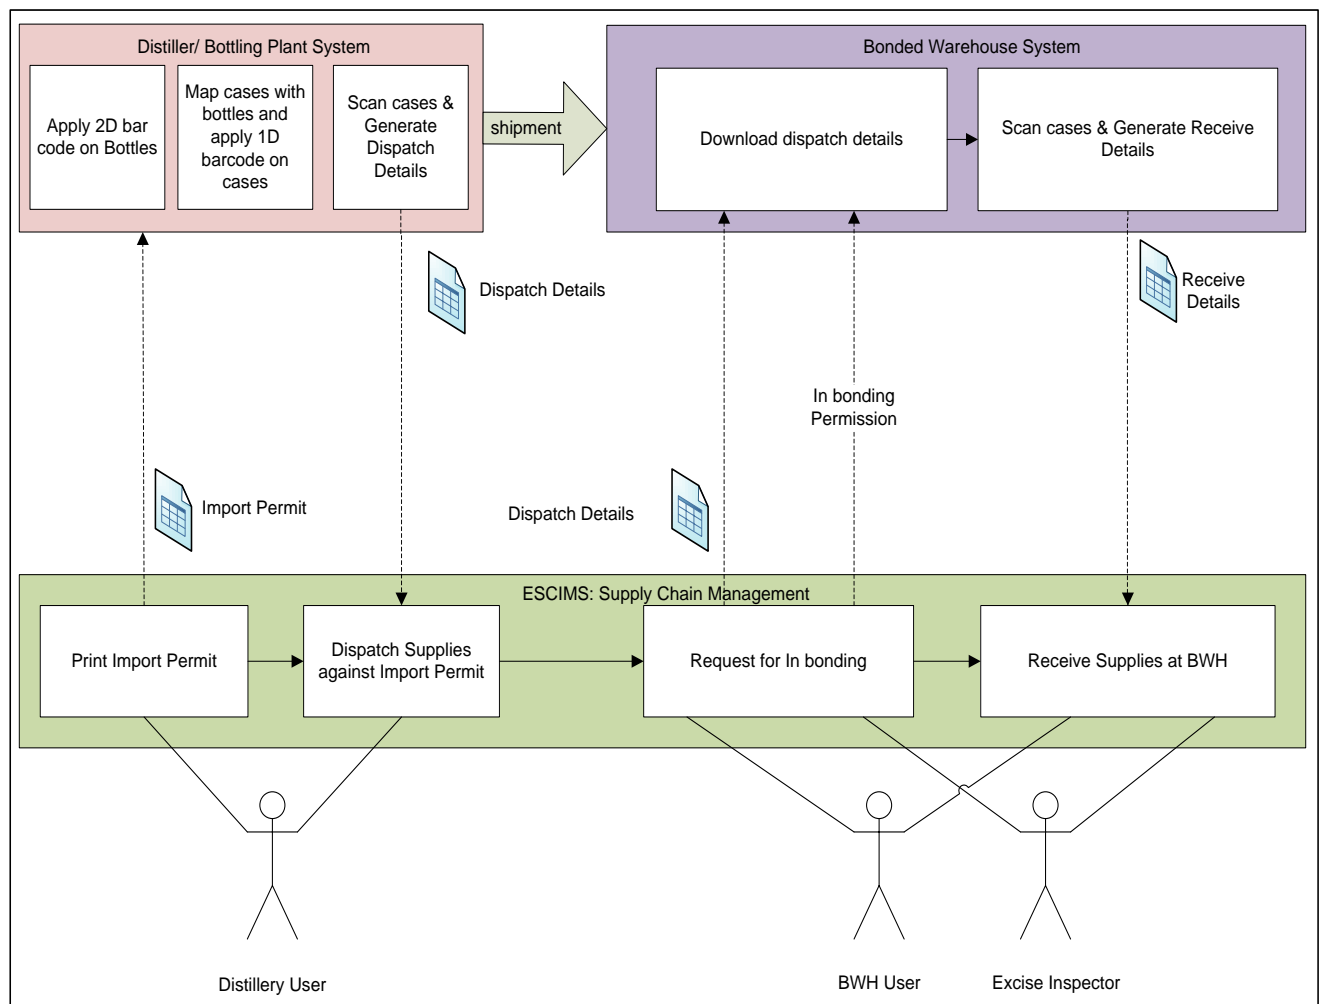

Figure 1: Overview of Dispatch & Receive Supplies against Import Permit

3.1 Generate Barcode Sequence No (Distillery)

This activity deals with generating the barcode sequence numbers at the distillery, downloading and printing the barcodes, and pasting the barcodes on the cases and bottles.

3.1.1 Generate Barcode Sequence No (IMFL Distillery)

This section shows the steps to generate bar code sequence nos. This task is performed by IMFL Distillery user.

To generate Bar Code Sequence Nos:

1. Click on **SCM-> Generate Barcode Sequence No**.Link

Figure 2: Generate barcode numbers Screen 1

2. On the **Generate Barcode Sequence Numbers** screen, select **Brand Name**. Values in **Size (in ml)** are updated.
3. Select **Size (in ml)**. **Pack Size** is updated according to the selected **Brand Name** and **Size (in ml)**.
4. Enter **Quantity (in Cases)**
5. Click **Submit**. The downloadable file for the barcode is displayed.

Figure 3: Generate barcode numbers Screen 2

6. Click the **download** link to download the file with the generated barcodes.

- Click the **Password Management** link , to change the EQMS login password.
- Click **Cancel**, to navigate to the home page,
- The product of **Quantity** and **Pack Size** must be less than 50000.
- You can download barcodes on the basis of mapped or unmapped data in the **Generation Type**, as registered at the time of licensing.

3.1.2 Generate Barcode Sequence No (IFL BWh)

This section deals with the steps to generate the bar code sequence nos. for Imported Foreign Liquor (IFL BWh). This task is meant for the BWh users.

To generate Bar Code Sequence Nos (IFL)

1. Click on **SCM-> Generate Barcode Sequence No.Link**

The **Generate Barcode sequence numbers- Foreign Liquor Screen 1** is displayed.

Figure 4: Generate Barcode sequence numbers- Foreign Liquor Screen 1

2. Select a TTP number
3. Click **Fill Details**. The TTP details are displayed.

SNo	Brand Name	Size (in ml)	Pack Size	Quantity (in Cases)	Batch Number	Import Date	Expiry Date	Generate Barcode
1	mangodeepak	25	2	3				
2	NVNbranddeepak	25	2	3				
3	Dowells	750	12	3				
4	Bullet	1290	2	3				

Figure 5: Generate Barcode sequence numbers- Foreign Liquor Screen 2

4. Depending on the type of liquor for which you want to generate the barcode, do one of the following:
 - a. For beer, enter **Batch Number, Import Date, ExpiryDate**.
 - b. For other forms of liquor, enter **Import Date**.

3.2 Provide Barcode Details (Distillery)

This topic deals with providing barcode details in the system for the distillery by distillery user.

To provide the barcode Details for Distillery

1. Click on **SCM->Provide Barcode Details** link
2. Click **Browse** to select the barcode file. The bar code file (in Excel format) should contain the bottle barcode, batch number, and expiry date, manufacturing date, case SSCC and case GTIN.
3. Click **Upload** to upload the file. One of the following happens:
 - a. If the file is uploaded successfully, **No. of mapped cases uploaded** is updated and a success message appears. Also, the **Upload** is disabled.
 - b. If the file is not uploaded successfully, **No. of mapped cases uploaded** is not updated and a failure message appears. Also, a link to view the error details is displayed.

2	IPN180912002288	EVERYDAY GOLD WHISKY	375	1600	

Figure 10: Dispatch supplies against import permit Screen 2

5. Enter the mandatory fields on the screen.
6. Click **Browse** to select the file (.xml or .xls) containing the details of the selected IP and case SSCC numbers.
7. Click **Upload** to upload the file. One of the following happens:
 - If the file is uploaded successfully, **Number of Cases** is updated and a success message appears. Also, the **Submit** is enabled.
 - If the file is not uploaded successfully, then system displays failure message and number of cases uploaded and an option to view mismatch details.
 - If the file is uploaded successfully but the number of cases uploaded is less than number of cases mentioned in the IP, then reason for short supply text area appears
8. Click **Submit** to dispatch the import permit.

- Click **Cancel** to navigate to home page, .
- You have to select at least 1 and maximum 2 import permits for dispatch. Specifications of the Uploaded File:
 - File format should be .xls
 - The heading of the XL Sheet is case sensitive,
 - IPNO
 - CASENO
 - IPNO: This should have the IP No. in each row
 - CASENO: This should have the second barcode of the case, i.e. SSCC (Serial Shipment Container Code) No.

3.4 In-bonding at BWh

The vehicle dispatched from distillery is in-bonded at the BWh. The BWh user requests for the in-bonding permission from Excise posted at the BWh.

3.4.1 Request for In-bonding (BWh)

This section shows the steps to request for in bonding by BWh User. This task is performed by BWh user.

To Request for in bondingBWh

1. Click on **SCM ->Request for Inbonding**link

Request for in bonding Screen is displayed.

Figure 11: Request For In-bonding Screen

2. Click on **Download Dispatch Details**link and save the file at location D:/ESCIMS
3. Enter truck arrival date and time
4. Click **Submit**

- Click **Save & Close**, to save the current data and exit the screen.
- Click **Cancel**, to go back to the previous screen

3.4.2 Approve In-bonding Request (Excise Inspector)

This section shows the steps to approve in-bonding request by Excise Inspector.

To Approve In-bonding Request by Excise Inspector

1. Click on **SCM ->Worklist**link

The **Excise Inspector Worklist** is displayed.

3.5 Receive Supplies at BWh

The 'Receive Supplies at BWh' process helps the BWh user to receive the supplies which were shipped against an Import Permit. The process is as follows:

1. The BWh user uploads the details of the supplies received at the BWh and forwards the details to the excise inspector for verification.
2. Post verification from the excise inspector, the received supplies get updated in the ESCIMS system against the inventory of the BWh and the information becomes available to Permits branch of the excise department.
3. The users from the permits branch can then view the inventory available at the BWh and can process the transport permits against which the supplies can further be dispatched to the retail vends.

As a standard operating guideline, the BWh user shall only prepare the receive details of completely intact cases using the HHT application and shall keep all the damaged cases aside, which shall be dealt through 'Handle Breakage In-transit' process.

3.5.1 Receive Supplies through HHT

The supplies dispatched from BWh will be received by scanning the barcodes of the intact cases from the HHT device.

3.5.1.1. Scanning of Barcodes through HHT (BWh)

This section provides the steps to scan barcodes of intact cases received against IP. This task is performed by BWh user.

To scan barcodes of intact cases received against IP:

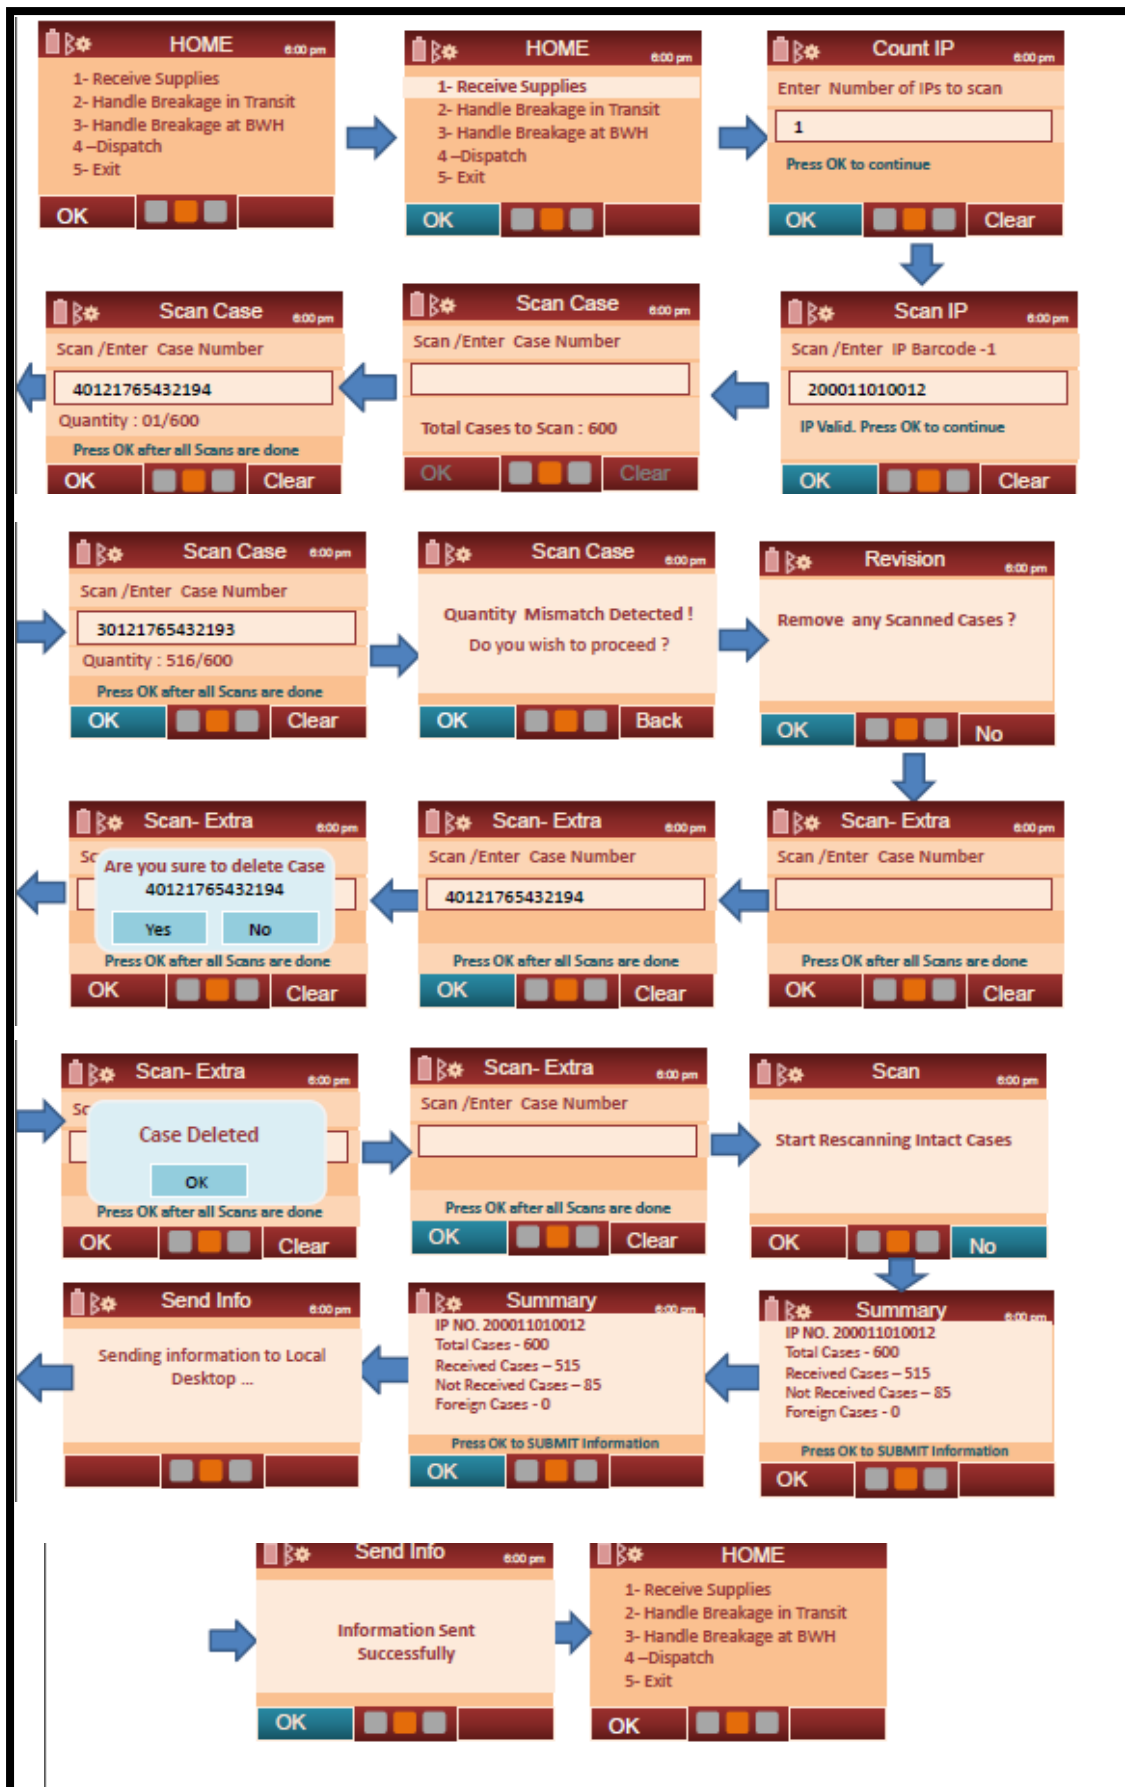

Figure 21: HHT-Receive Supplies Screen

1. Select **Receive Supplies** and press **Ok**
2. Enter No. of Ips to be scanned and press **Ok**

	<ul style="list-style-type: none"> ▪ Press Clear, to clear the screen
---	---

3. Scan IP Barcode
4. Scan Intact cases Barcode No.
5. Press **Ok** after all scans of intact cases are done
6. Press **Ok**, if you want to finish the receiving process

	<ul style="list-style-type: none"> ▪ Press Back, to go back to the receiving screen ▪ You can also enter the barcode, if you are not able to scan

HANDLE BREAKAGE

With HHT

4 Handle Breakage

To minimise the losses incurred to the licensee due to breakage, the excise department allows the licensee to repack the left over bottles of a particular SKU from the damaged cases into new cases, by putting a new barcode on the cases and uploading the details to the ESCIMS system.

Hence, the handling of breakage is categorised as follows:

- **Handle Breakage In-transit**
- **Handle Breakage at BWh**

4.1 Handle Breakage In-transit

The repackaging of bottles (of a particular SKU), into new cases is allowed for the bottles of the same batch and shipment (i.e. Import Permit) only. The bottles which cannot be repacked into complete cases are moved into a separate inventory in the BWh, so that such bottles can be repacked while handling breakage at BWh..

4.1.1 Download Damaged details file (BWh)

This section provides the steps to download damaged details file by BWh user:

To download damaged details file

1. Click on **Warehouse Functions -> Handle Breakage** link

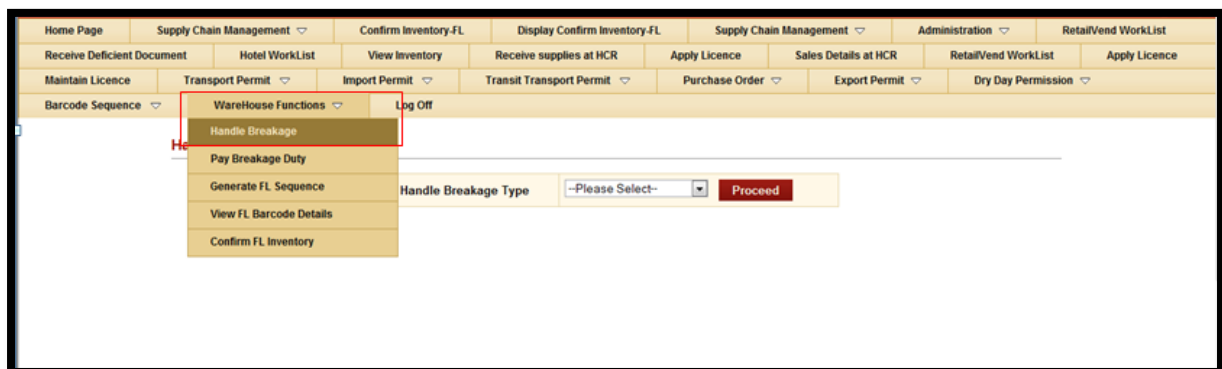

Figure 27: Handle Breakage in Transit Screen 1

2. Select **In Transit** option from the drop-down of Handle breakage Type and click on **Proceed** to handle the breakage In Transit.

Handle Breakage

Figure 28: Handle Breakage in Transit Screen 2

List of import permit number for handling breakage in transit will be displayed.

Handle Breakage In Transit					
S.No	Import Permit Number	Number Of Cases Dispatched In IP	Number Of Unreceived Cases	DownLoad Case Details	DownLoad Bottle Details
1	IPN130812005116	209	24	File 1	File 1
Cancel					

Figure 29: Handle Breakage in Transit Screen 3

3. **File 1 of Download Case Details** can be downloaded for re-printing of case barcodes for further repackaging of cases.
4. **File 1 of Download Bottle Details** will download an encrypted XML file which will consists of cases and bottle details corresponding to the cases not received. Upload the file on HHT device for re-packaging.

4.1.2 Scan Repackaged case & bottle barcodes through HHT (BWh)

This section provides the steps to scan repackaged cases and bottles corresponding to the in transit breakage: This task is performed by BWh user.

To scan repackaged cases and bottles,

1. Select **Handle Breakage in Transit** and press **Ok**

2. Scan IP Barcode and press Ok

	<ul style="list-style-type: none"> Click Clear to clear the screen
---	--

3. Scan Repacked Case barcode
4. Scan bottles barcodes of the corresponding repacked case
5. Press **No**, if all the repacked cases are scanned

	<ul style="list-style-type: none"> Click O, to scan next repacked case You can also enter the barcode, if you are not able to scan
---	---

6. Press **Ok**, to scan any loose bottle

	<ul style="list-style-type: none"> Click No, if all the bottles are repackaged and there is no loose bottle left
---	--

7. Scan the barcode of loose bottles
8. Press **Ok** when all the scans are done
9. Press **Ok** to submit the information

	<ul style="list-style-type: none"> The device should be connected to desktop while submitting the information On submitting the information, the file is created and saved in the desktop at location
---	---

4.1.3 Upload repackaged details file (BWh)

This task is performed by BWh user. This section provides the steps to upload repackaged details file:

To upload repackaged details file,

1. Click **Warehouse Functions -> Handle Breakage** link

The **Handle Breakage in Transit Screen 3** is displayed.

4.2.5 Approve BWh Breakage (EI)

This section provides the steps for the Excise Inspector to approve BWh Breakage

To approve BWh Breakage,

delhi.gov.in
Govt. of NCT of Delhi

Department of Excise, Entertainment & Luxury Tax, Govt. of Delhi

Excise Department

*Department of Excise, Entertainment & Luxury Tax Govt. of Delhi : Revenue is the most important input for an able, efficient and resourceful administration. In India since ancient times, there has been a well planned, well defined, clear, strong and just system of revenue collection. With the passage of time there have been changes in the system of revenue collection. Today we find various tax free items, which were earlier used to be taxed. *

DISPATCH AGAINST TRANSPORT PERMIT

5 Dispatch against Transport Permit at BWh

The supplies are dispatched from BWh against the Transport Permits (TP). While dispatching against TP, cases are scanned by the HHT and the scanned file is uploaded to ESCIMS..

5.1 Identify TPs (BWh)

This section provides the steps to identify TP to be dispatched in a single truck by BWh User:

To identify TP,

1. Click on **Transport Permit -> Prepare For Dispatch** link

The **Prepare for Dispatch against TP Screen** is displayed

The screenshot shows the 'Prepare for Dispatch Against TP' screen. The header includes the Delhi government logo and the department name. The user is logged in as Swati Sharma. The main content area has a form titled 'Truck Details' with three input fields: 'Truck Number', 'Drivers Name', and 'Drivers Contact Number'. Below the form are three buttons: 'Save', 'Reset', and 'Cancel'. To the right of the buttons is a link labeled '+ Add Transport Permit'. The top navigation bar contains various links like 'Home Page', 'Supply Chain Management', 'Confirm Inventory-FL', etc. The bottom status bar shows the system time as 15:51.

Figure 62: Prepare for Dispatch against TP

2. Enter the truck no., driver name and driver contact no. and click **Save**
3. Click on **Add Transport Permit** Link

The **Active TP Screen** is displayed

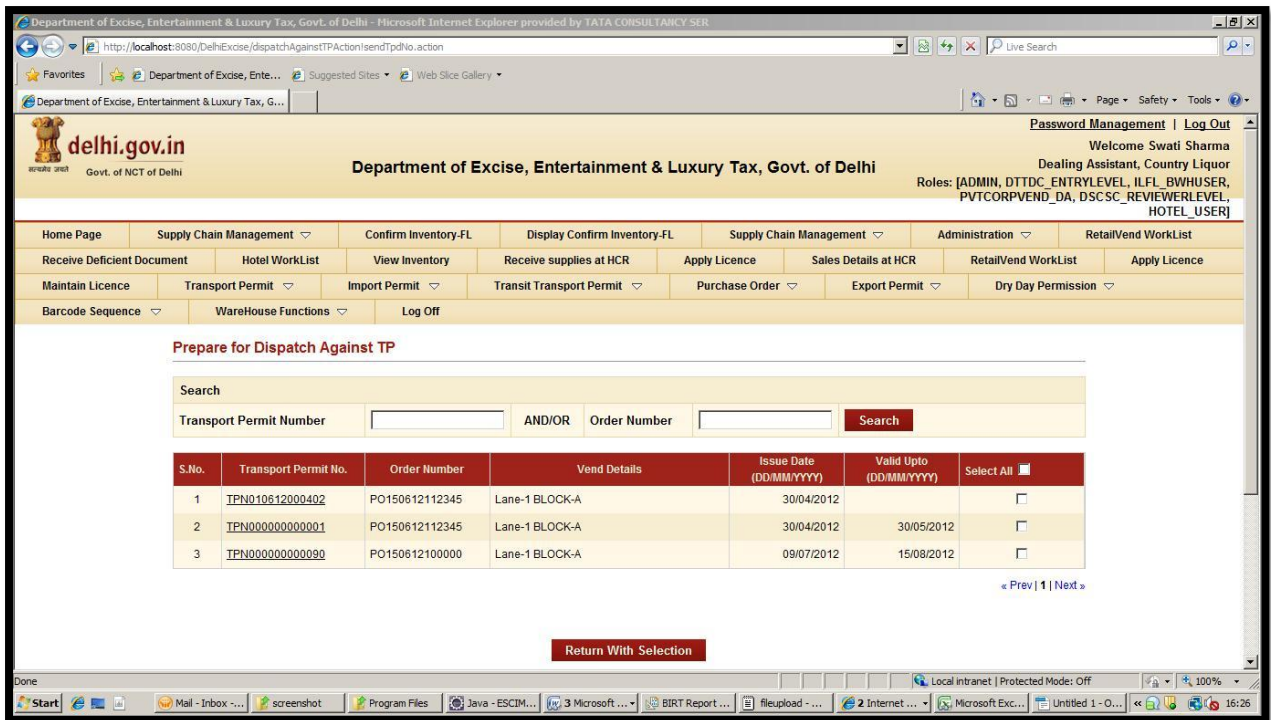

Figure 63: Active TPs Screen

- Select the TPs to be dispatched in that truck and click **Return with Selection**

The **Prepare for Dispatch Screen 2** is displayed

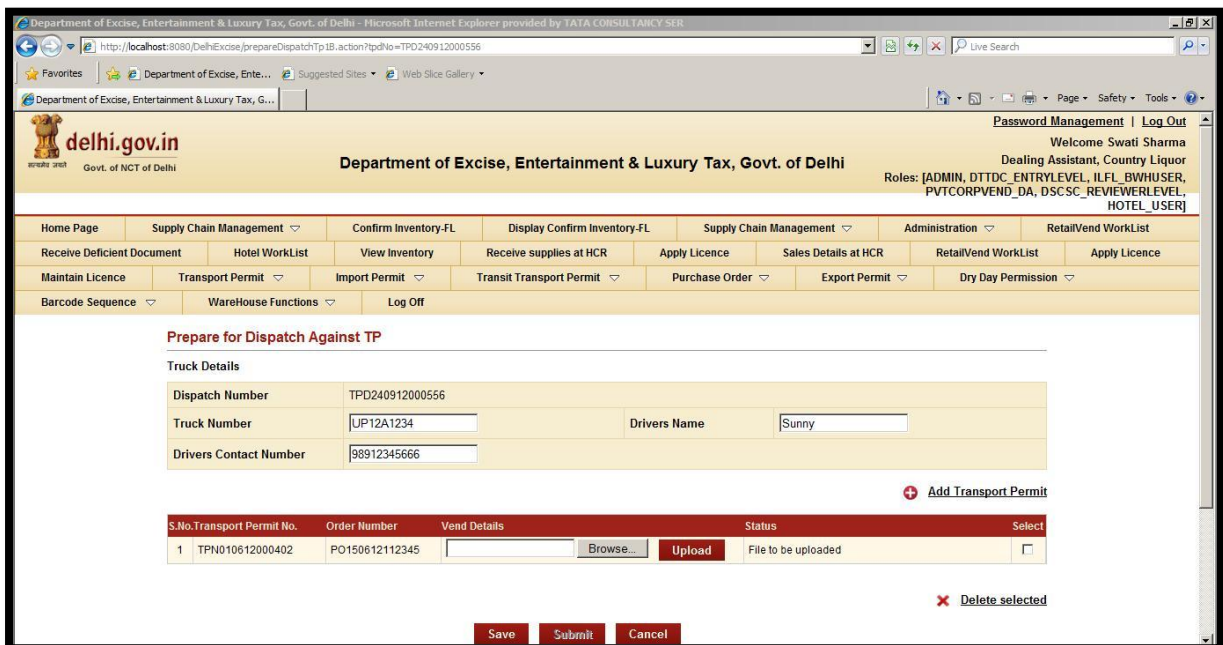

Figure 64: Prepare for Dispatch Screen2

- Click on **Transport Permit No.** link to view the TP details
- Click **Search**, to search the TP by Transport Permit No. and/or Order No.

5. Click **Save and Close** the screen

5.2 Scan case barcodes through HHT (BWh)

This section provides the steps to scan case barcodes from HHT by BWh user:

To scan case barcodes,

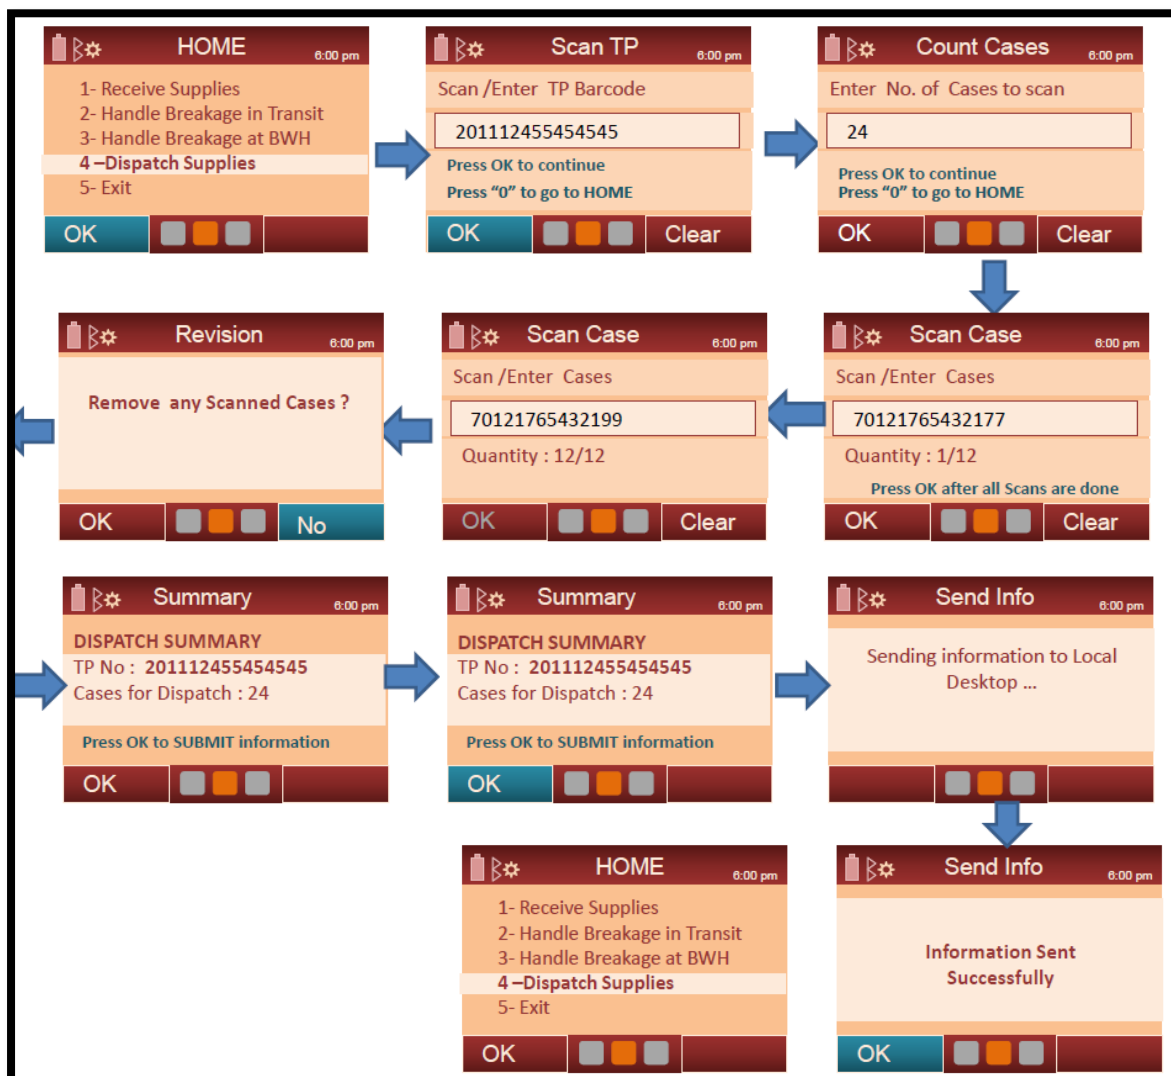

Figure 65: Dispatch Supplies through HHT Screen

1. Select **Dispatch Supplies** and press **Ok**
2. Scan TP Barcodes and press **Ok**
3. Enter No. of Cases to scan and press **Ok**

- Click **Clear**, to clear the screen

4. Scan case barcodes to be dispatched
5. Press **Ok** after all scans are done
6. Press **No**, if all the correct cases are scanned

- Click **Ok**, to remove any scanned case
- You can also enter the barcode, if you are not able to scan

7. Press **Ok** to submit the information

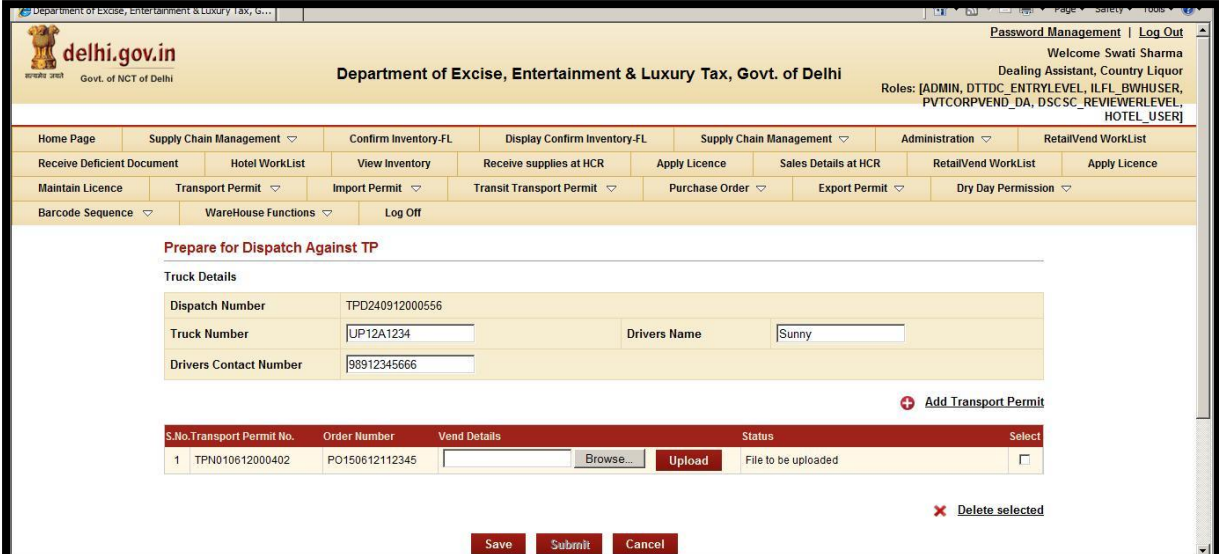

5.3 Upload barcode file (BWh)

This section provides the steps to upload barcode file by BWh user:

To upload barcode file,

1. Click SCM->Prepare for Dispatch-> Savedlink
2. Select the work-itemlink

The **Prepare for Dispatch against TP Screen 2** is displayed

5. **Select** and update the status from the dropdown of the inventory.
6. Click **Save**. The status of the inventory will update and count of BWh inventory will update.

- Click **Cancel.** to navigate to the home page,

6.2 Track through GPRS (EI)

This section provides the steps to Track through GPRS by EI

To Track through GPRS,

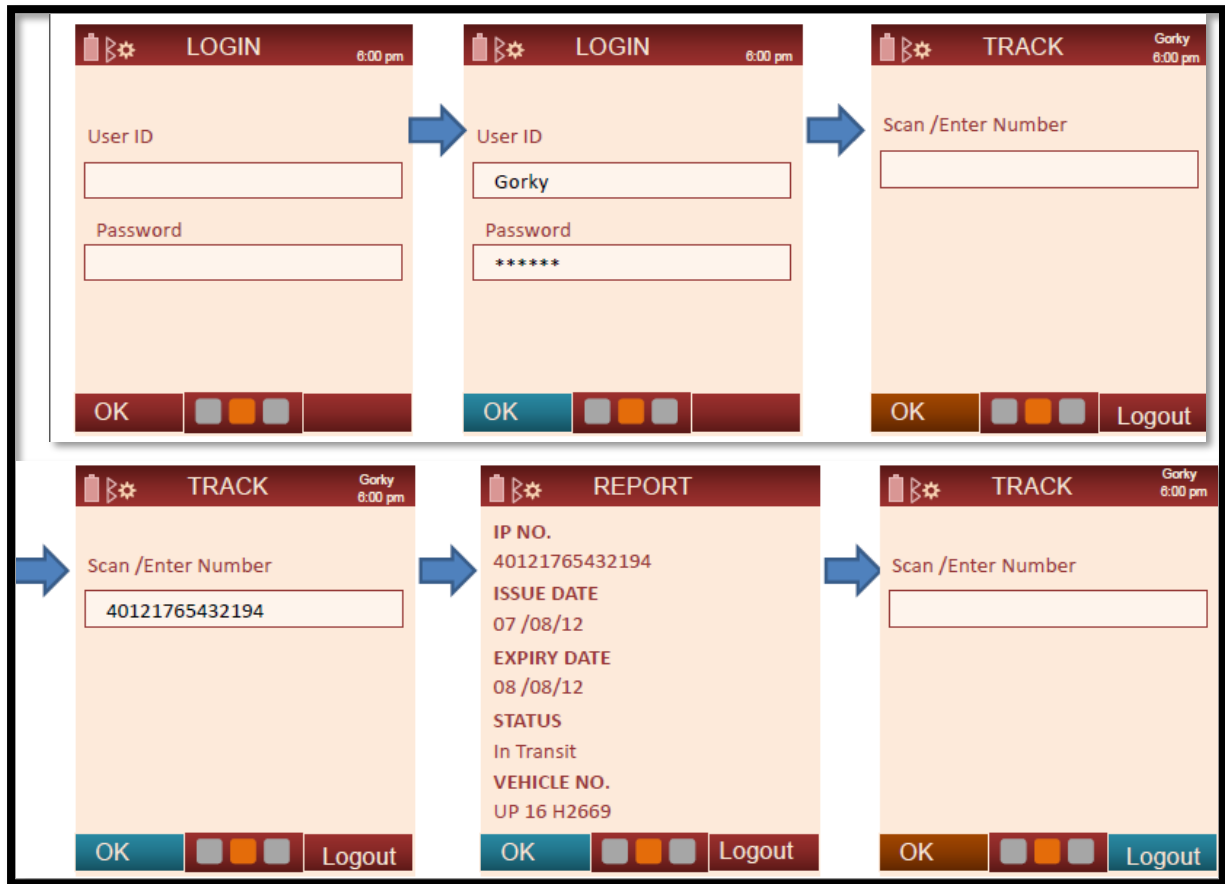

Figure 74: Track through GPRS Screen

1. Enter **User Id** and **Password**, and press **Ok**
2. **Scan Barcode** and press **Ok**

The **GPRS output screen** is displayed.

	<ul style="list-style-type: none"> ▪ The following barcodes can be scanned : <ul style="list-style-type: none"> ○ Case Barcode ○ Bottle Barcode ○ Transport Permit No. ○ Import permit no. ▪ Truck No. : You can also enter vehicle no. to track the consignment
---	--

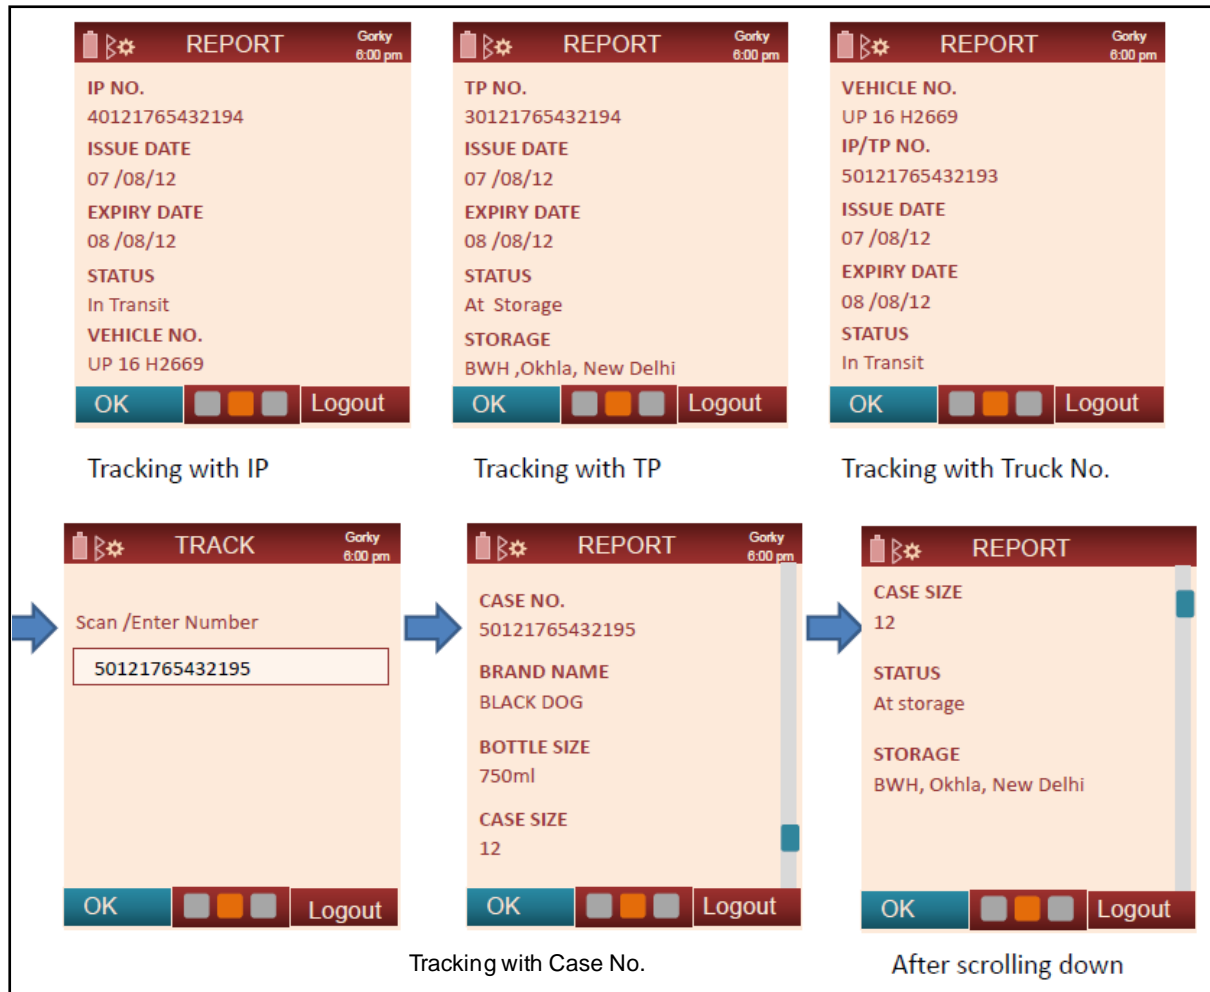

Figure 75: GPRS Output Screen

6.3 Track and Trace from ESCIMS (AC/Superintendent/GM Excise/DC/Commissioner)

This task is performed by AC/Superintendent/GM Excise/DC/Commissioner. This section provides the steps of Track and trace from ESCIMS:

To track and trace from ESCIMS:

Figure 76: Track & Trace through ESCIMS Screen 1

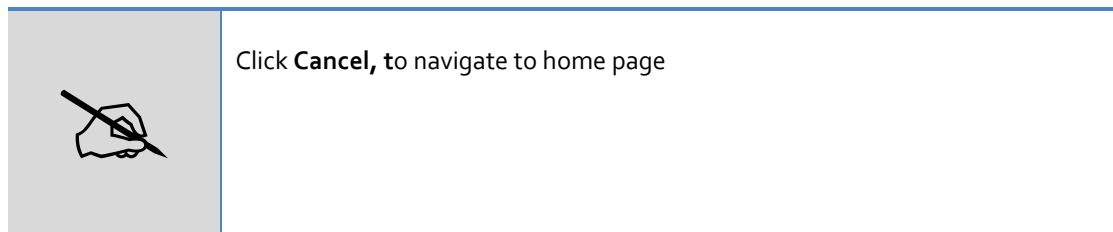

1. Click on **SCM-> Track and Trace** link
2. Enter the **Case/ Bottle Barcode** to be tracked and traced, click on **Search** to find the current status of case/bottle.

Figure 77: Track & Trace through ESCIMS Screen 2

3. Click on **View History** link, to trace the case/ bottle.

Figure 78: Track & Trace through ESCIMS Screen 3

4. The system displays the date wise track and trace of the selected barcode of the bottle/ case.

HCR PROCESSES

7 Receive Details and Upload Sales Data at HCR

At HCR, the following activities are performed in ESCIMS:

- Receive Supplies
- Issue Stock for Sale

7.1 Receive Details against Transport Permit at HCR

The Hotel, Club, Restaurant receive the consignment which is dispatched from the BWh against a TP. This consignment is scanned and received with the HHT device. This section provides the details of receiving the consignment through HHT device.

7.1.1 Scan file through HHT (HCR)

This task is performed by HCR user. This section provides the steps to scan file from HHT at HCR:

To scan file from HHT,

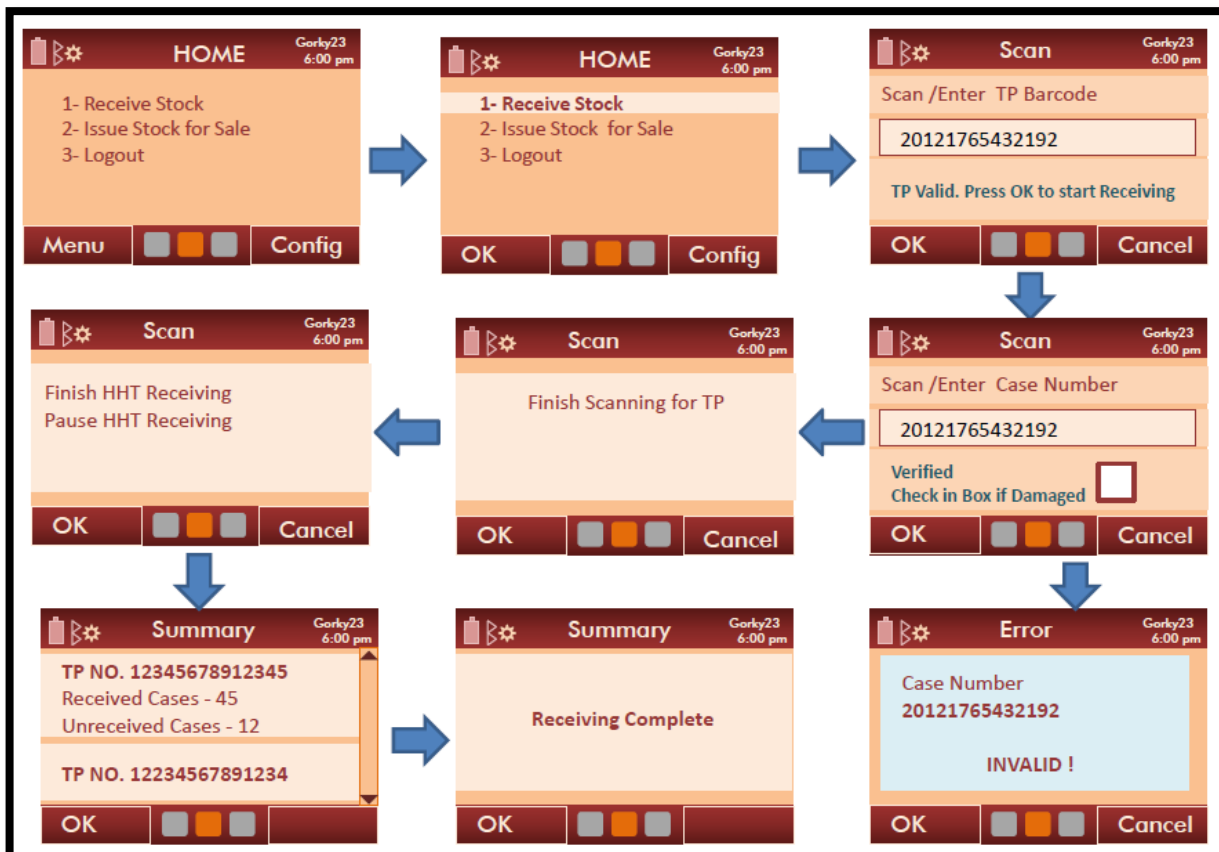

Figure 79: Scan File at HCR

1. Select **Receive Stock** and press **Ok**
2. Scan the TP Barcode
3. Scan the case barcode of intact cases

4. On completing the scanning of intact cases, press **Ok**.
5. Press **Ok** to submit the information.

7.1.2 Upload scanned file (HCR)

This task is performed by HCR user. This section provides the steps to upload scanned file at HCR:

To upload scanned file,

1. Click **SCM->Receive Supplies at HCR** link

The **Receive Supplies at HCR Worklist** Screen is displayed

The screenshot shows a web interface titled 'Worklist'. It has a search section with 'Workitem Type' and 'Workitem Status' dropdown menus and a 'Search' button. Below is a table with the following data:

S.No	Workitem Number	Workitem Type	Workitem Reference	Workitem Status
1	160580	Receive Supplies	TP 200011010012	Dispatched
2	160581	Receive Supplies	TP 200011010013	Dispatched

At the bottom, it says 'Copyrights with DEPARTMENT OF EXCISE, ENTERTAINMENT & LUXURY TAX' and 'Implemented & Managed by TATA CONSULTANCY SERVICES'.

Figure 80: Receive Supplies at HCR Work-list Screen

2. Click the **Workitem No.** link

The **Receive Supplies at HCR** Screen is displayed.

The screenshot shows the 'Receive Supplies at HCR' screen. At the top, it says 'Thursday : 12/01/2012 05:20:40 PM IST' and has links for 'Home Page', 'Change Password', and 'Logout'. The header includes the 'delhi.gov.in' logo and 'Department of Excise, Entertainment & Luxury Tax, Govt of NCT of Delhi'. It also says 'Welcome: HCR User' and 'Last Login: 10/01/2012 02:19:40 PM IST'. There are navigation links: 'Home', 'Provide Sales Details', 'View Inventory', and 'View Registers'. The main section is titled 'Receive Supplies at HCR' and contains a table with the following data:

Transport Permit Number	201201512345679215698	Invoice Amount (₹)	180000.00

4. Select **Received** or **damaged** value from the drop down, and **Submit**

7.2 Upload Sales Details at HCR

At HCR the stock is moved from the store to the sale counter. From there the stock is sold to the consumer.

You can either scan while issuing the stock to counter for sale or upload the file of sold cases/bottles.

7.2.1 Issue Stock for Sale (HCR)

The stock is scanned with the HHT and uploaded to ESCIMS, when being issued to the counter. This section deals with the steps to scan the cases/bottles with the HHT and upload the scanned files.

7.2.1.1. Scan file through HHT (HCR)

This task is performed by HCR user. The following are the steps to scan a file with the HHT at HCR:

To scan a file with the HHT,

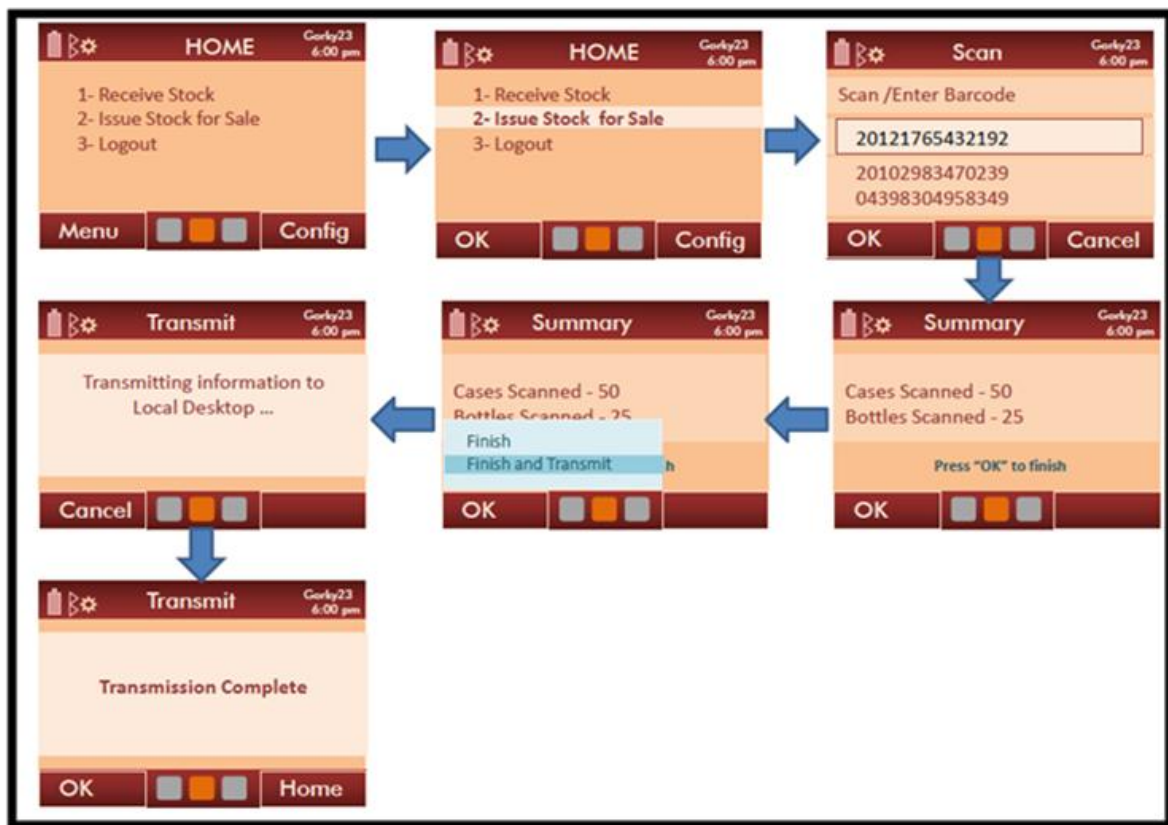

Figure 86: Sales Details at HCR Screen

1. Select **Issue Stock for Sale**, and press **Ok**
2. Scan bottle and case barcodes
3. Press **Ok**, after all scan are done
4. Press **Ok** to submit the information
5. Press **Ok** complete the transmission

7.2.1.2. Upload Scanned file (HCR)

Below are the steps to upload the scanned file at HCR:

To upload the scanned file,

1. Click **SCM->Sales Details** link

The **Sales Details at HCR** Screen is displayed.

The screenshot shows the 'Sales Details at HCR' interface. At the top, there's a header with the Delhi government logo and navigation tabs: Licence, Purchase Order, Payments, SCM, and Permit P-13. The main content area has a search section with a 'Barcode of sold SKU' input field containing the value '192300010000005141' and a 'Submit' button. Below this is an 'Upload Sales Data' section with a file selection area (indicated by a grey box) and a 'Browse...' button, followed by a 'Process' button. A 'Cancel' button is positioned at the bottom center of the form area.

Figure 87: Sales Details at HCR Screen

2. Browse and upload the Sales Details File and click **Process**

The diagram consists of a grey rectangular box on the left containing a black line-art icon of a hand holding a pen, as if writing. To the right of this box, within a larger frame, is the text: 'Enter the **Barcode of Sold SKU** and **Submit**, to issue the stock without using HHT'.

Appendix A: Operating Environment

This section provides the details of the software and hardware environment used in ESCIMS.

Software Environment

Table 2: Software Environment
